CONTENTS

No. 1 NOVEMBER, 1924

D. W. Kingsley. Regressive structures and the lymphocyte. The plasma cell; its origin and development. A study of the mammalian nictitating membrane. One plate (six figures) 1

Ralph F. Shaner. On the muscular architecture of the ventricles of the alligator heart, with a note on the formation of the interventricular septum of birds and mammals. Six figures 21

Edmund Barta. Experimental histological studies. I. Some factors regulating the morphology of tissue (ureter in vitro). Ten figures 33

D. J. Bowie. Cytological studies of the islets of Langerhans in a teleost, Neomaenis griseus. Six figures 57

No. 2 DECEMBER, 1924

American Society of Zoölogists, Twenty-second Session:

Program 76

List of Titles 78

Exhibits 86

Abstracts 87

Constitution, By-laws, Historical 153

Officers and List of Members 157

No. 3 JANUARY, 1925

W. H. Gates. Litter size, birth weight, and early growth rate of mice (Mus musculus). Four charts 183

Walter E. Sullivan and Carroll W. Osgood. The facialis musculature of the orang, Simia satyrus. Six figures 195

Proceedings of the twenty-second annual meeting of the American Society of Zoölogists 245

No. 4 FEBRUARY, 1925

H. S. Burr and G. B. Robinson. An anatomical study of the Gasserian ganglion, with particular reference to the nature and extent of Meckel's cave. Eight figures..... 269

Carl G. Hartman and Bessie League. Description of a sex-intergrade opossum with an analysis of the constituents of its gonads. Two plates..... 283

Raphael Isaacs. The refractive granule red blood corpuscle. Its behavior and significance. Fifteen figures 299

R. J. Terry. An improved laboratory table for gross anatomy. One figure..... 315

J. A. Long. Some laboratory apparatus and methods for embryological and cytological work. Fifteen figures 319

P. A. Stegall. A method for sectioning the whole human brain..... 341

No. 5 MARCH, 1925

American Association of Anatomists, Forty-first Annual Session:

Abstracts 343

Demonstrations 400
